PROTECTORS

CUSTOM WEIGHT (4 UNITS)

The CustomWeight system consists of four 3g gel plates designed to provide additional weight and protection in specific areas of the racket. This customization allows the racket's balance to be adjusted to each player's individual needs, optimizing performance. The CustomWeight racket structure allows for the installation of up to four weights on the top. This new, more flexible configuration allows for the addition of up to 12g of additional weight, offering multiple customization possibilities to achieve the perfect balance and improve your game.

BLACK

OVERGRIPS

GR-1210 (2 UNITS)

Great comfort. Thicker padded finish. Greater durability and maximum grip. Firmer, more secure hold. Softens jolts and vibrations. Easy to put on.
