CERTIFIED QUALITY BY TESTEA PADEL

All the rackets in the new collection have the quality seal certified by Testea Padel, the prestigious independent laboratory located at the Universitat Politècnica de València. The Testea Padel quality certificate includes a series of laboratory tests designed with three fundamental objectives: first, to ensure that all units of the same model behave uniformly; second, to ensure resistance to fatigue so that the racket maintains its performance with use; and third, to verify the resistance to breakage of both the frame and the face of the racket.” explains Jordi Piedra, CEO and co-founder of Testea Padel. To obtain the Testea Padel seal, the rackets are subjected to the most rigorous resistance and durability tests in a specialised laboratory, evaluating both the frame and the faces of the rackets.

12K^{XTREM}

CARBON 12K XTREM

Carbon with a premium finish and a smoother, more even surface for a sleek and distinctive aesthetic. Its optimised structure improves stiffness and durability while ensuring solid performance on every shot.

DUAL SPIN

DUAL SPIN

The evolution of our rough-surface technologies, featuring a 3D texture and a low-weight silica sand finish layered across the entire face of the padel. This combination of double roughness further maximises spin generation, without compromising the durability of the materials.

CHROMIC PAINT

CHROMIC PAINT

Reactive paint in the heart of the racket that is synchronized with the color of the rubber, offering a harmonious and striking aesthetic.

WEIGHT BALANCE

WEIGHT BALANCE

Interchangeable counterweight system that allows you to adjust the weight and balance of the racket according to the player's preferences. Includes 2g and 4g pieces that are easy to fit and is compatible with frame protectors.

18K
ALUM**CARBON 18K ALUM**

Aluminized 18K carbon that provides a solid and comfortable feel and a more homogeneous performance under temperature changes.

12K
ALUM XTREM**CARBON 12K ALUM XTREM**

Carbon that reduces fibre waviness and interlacing by 50%, achieving a finer, smoother and more uniform surface. It offers greater rigidity, a cleaner and more durable finish, and thanks to aluminisation, it maintains consistent performance despite temperature changes.

18K**CARBON 18K**

Maximum stiffness and strength while maintaining the lightness of the racket thanks to the finest intertwined carbon microfilaments in our range of rackets.

12K
XTREM**CARBON 12K XTREM**

Maximum stiffness and strength while maintaining the lightness of the racket thanks to the finest intertwined carbon microfilaments in our range of rackets.

12K**CARBON 12K**

Carbon that is achieved by interlacing carbon ribbons vertically and horizontally. By achieving much more rigidity, the carbon is thinner and weighs 25% less. We reduce the weight of the racket without losing stiffness or durability.

3K**CARBON 3K**

The 3K weave is achieved by interlacing the carbon fibre threads into small squares.

FG**FIBER GLASS 3K**

Fibreglass fabric with three layers that generate a higher degree of thickness, increasing the strength and durability of the product.

FG
SILVER**FIBER GLASS SILVER**

Fibreglass with a metallised finish to give this material a degree of stiffness that is somewhere between carbon and fibreglass.

MLD
BLACK EVA**MULTILAYERED BLACK EVA**

Multilayer core that combines different rubber densities to optimise ball exit in low speed defensive shots and power in finishing shots.

HR3
COLOREVA**HR3 COLOR EVA**

Core made of high-density HR3 rubber in various colors, providing maximum memory effect. This ensures greater power in hits and ball rebound.

HR3
BLACK EVA**HR3 BLACK EVA**

Core with high-density black HR3 rubber offering maximum memory effect. This provides greater power in every shot, especially in smashes.

HR3
HARD EVA**HR3 HARD**

Core with high-density tinted HR3 rubber, delivering great power and a firm feel on impact.

HR3
SOFT EVA**HR3 SOFT**

Core with low-density tinted HR3 rubber, ensuring greater control and excellent ball rebound.

HR3
WHITE EVA**HR3 WHITE EVA**

Core with low-density white HR3 rubber, providing a strong sense of control. Ideal for rackets with a soft feel and reduced weight.

EV50**EV50**

High density rubber core and extraordinary reactivity that gives a plus of speed to the ball in fast shots, especially in the game near the net. Solid feel and medium-high hardness.

EXCLUSIVE
SPIN**EXCLUSIVE SPIN**

New technology that includes two types of rough finish on the surface of the face: the 3D hexagonal finish located in the center of the racket and the sand finish on the rest. With this double roughness we obtain greater control and the possibility of printing more spin on the ball. Molded with a low weight silica sand bath. With this roughness we obtain shots with more spin.

3D
TEXTURE**TEXTURE 3D**

Rough finish applied to the last layer of the racket face to increase the effect of the shots without sacrificing the durability of the rough.

ROUGH
SURFACE**ROUGH SURFACE**

Rough surface on the last layer of the racket face. It can be made by pre-molded plastic material or with a bath in silica sand of low grammage. With this roughness, more effective shots are achieved.

DUAL
SPIN**DUAL SPIN**

The evolution of our rough-surface technologies, featuring a 3D texture and a low-weight silica sand finish layered across the entire face of the padel. This combination of double roughness further maximises spin generation, without compromising the durability of the materials.

CUSTOM
GRIP**CUSTOM GRIP**

The entire Luxury range incorporates the patented NOX Custom Grip® technology, certified by Testea Padel to increase grip and reduce vibrations.

CARBON
FRAME**CARBON FRAME**

By using this material in the frames we give more rigidity and durability to the frame and the racket in general.

EOS
FLAP**EOS FLAP**

Side perforations designed to increase the manageability of the racket and distribute the weight distribution so that you have a fast and lethal racket in your hands.

EOS
TUNNEL**EOS TUNEL**

Lateral perforations integrated into the mould improve aerodynamics, increase manoeuvrability and optimise weight distribution, giving you a faster, more agile and more precise racket with every shot.

WEIGHT
BALANCE**WEIGHT BALANCE**

Interchangeable counterweight system that allows you to adjust the weight and balance of the racket according to the player's preferences. Includes 2g and 4g pieces that are easy to fit and is compatible with frame protectors.

AVS**ANTI VIBRATION SYSTEM**

Rubber pieces that are embedded in the frame of the racket to absorb possible vibrations that occur when the ball is not hit in the center of the racket.

PULSE
SYSTEM**PULSE SYSTEM**

Reduction of vibrations transmitted to the player's hand with the insertion of lateral rubbers that go from the base of the frame to the bottom of the racket cap.

DCS**DYNAMIC COMPOSITE STRUCTURE**

By applying more material from the frame to four centimeters into the face, the difference in hardness between the frame and the face is not noticeable. This prevents cracks on the outside of the racket.

OVERSIZE
GRIP**OVERSIZE GRIP**

30 mm grip extension for players who need a longer grip whether they have a two-handed stroke or not.

SMART
STRAP**SMARTSTRAP**

The Nox Smart Strap is the latest technology implemented in the new collection of rackets that will allow you to change the grip cord quickly and easily.

CHROMIC
PAINT**CHROMIC PAINT**

Reactive paint in the heart of the racket that is synchronized with the color of the rubber, offering a harmonious and striking aesthetic.

AT10 GENIUS 12K ALUM XTREM

BY AGUSTIN TAPIA

LAUNCH IN
OCTOBER 2025

DESCRIPTION

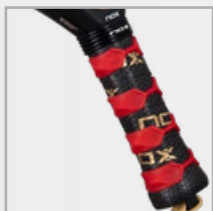

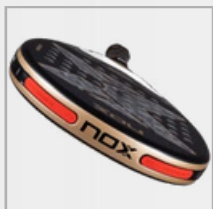

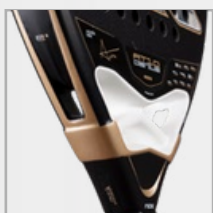

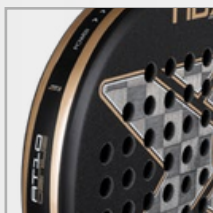

The AT10 12K Alum XTREM 2026 has been designed alongside Agustín Tapia for players seeking a firmer feel and the perfect balance between power and control. We've updated the mould, and in terms of technological innovation, it features the key highlights of the new AT10 collection: the **Weight Balance** counterweight system to adjust the racket's balance, **Chromic Paint** reactive finish and the **Dual Spin** surface, which maximises spin generation. This model incorporates the new 12K Alum Xtrem carbon, providing a stiffer feel on impact, greater durability and consistent performance even under significant temperature changes.

LUXURY SERIES

AT10 GENIUS 18K ALUM BY AGUSTIN TAPIA

LAUNCH IN
OCTOBER 2025

DESCRIPTION

The new AT10 Genius 18K Alum for the 2026 season raises the bar in innovation, evolving the racket with which Agustín Tapia reached the pinnacle of world padel with a new mould. This year, the racket used by the “Mozart of Catamarca” features the revolutionary Weight Balance counterweight system, allowing you to adjust the racket’s balance to your playing style for a fully personalised experience. A major aesthetic innovation is the Chromic Paint, a reactive finish in the core that synchronises with the rubber colour, creating a harmonious and striking appearance on court. Additionally, the new Dual Spin surface combines 3D texture and a silica sand finish across the racket face, maximising spin generation without compromising material durability.

AT10 GENIUS ATTACK 12K ALUM XTREM BY AGUSTIN TAPIA

LAUNCH IN
OCTOBER 2025

LUXURY SERIES

DESCRIPTION

The AT10 12K Alum XTREM Attack 2026 has been developed alongside Agustín Tapia for aggressive players seeking maximum power with a solid, firm feel on every shot. Its diamond shape, high balance and longer grip offer offensive play without compromising control. It features the key innovations of the new AT10 collection: the **Weight Balance** counterweight system, allowing personalised racket balance, **Chromic Paint** reactive finish and the **Dual Spin** surface, which enhances spin generation. In addition to a redesigned mould, it debuts the new **12K Alum Xtrem Carbon**, an exclusive NOX development that provides greater stiffness, a finer and more uniform surface, increased durability and stable performance even under extreme temperature changes.

AT10 GENIUS ATTACK 18K ALUM BY AGUSTIN TAPIA

LAUNCH IN
OCTOBER 2025

DESCRIPTION

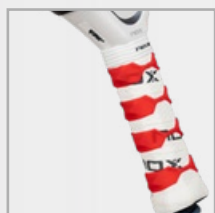

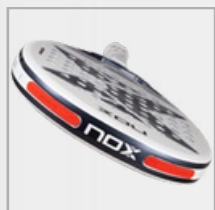

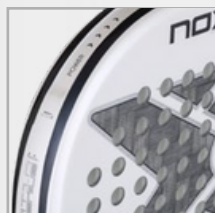

The new AT10 Genius Attack 18K Alum 2026 comes revamped for aggressive players looking for maximum power without losing precision. With its diamond format, high balance and longer grip, it is the perfect racket to dominate the offensive game. This season, we've redesigned it with an improved mould, and the standout innovation is the **Weight Balance** counterweight system, allowing you to adjust the balance to your preference. The racket also features the innovative **Chromic Paint** in the core, which reacts to light and changes colour, along with the **Dual Spin** surface to maximise spin. Combined with the **18K aluminised carbon** structure and the **MLD Black Eva** core, it ensures a solid, comfortable feel and consistent performance in any playing condition.

AT10 GENIUS 12K ALUM XTREM LITE

BY AGUSTIN TAPIA

LAUNCH IN
OCTOBER 2025

DESCRIPTION

The AT10 12K Alum XTREM Lite 2026 has been developed alongside Agustín Tapia for players seeking the perfect balance of power, control and greater lightness in their game. Weighing between 355 and 365 grams, this racket offers superior manoeuvrability without compromising the characteristic performance of the AT10 range. It features the new 2026 Luxury series mould and key innovations such as the **Weight Balance** counterweight system and the **Dual Spin** surface to maximise spin on every shot. Its **12K Alum Xtrem carbon** construction provides stiffness, durability and stability even under temperature changes, all in a lighter, more agile version for dynamic and precise play.

EA10 VENTUS HYBRID 12K XTREM BY EDU ALONSO

LUXURY SERIES

LAUNCH IN
OCTOBER 2025

DESCRIPTION

Designed together with Edu Alonso, one of the most outstanding young Spaniards on the professional circuit, the EA10 Ventus Hybrid 12K XTREM is designed for players who experience padel with maximum energy during every point. With its teardrop shape and perfect balance, this racket responds with agility on fast shots and offers the power and control needed to adapt to any situation. It features the **new mould from the 2026 Luxury racket collection**, which improves aerodynamics and overall performance, providing a more responsive and precise playing experience. Manageable and versatile, the EA10 Ventus Hybrid is the ideal racket for players who, like Edu Alonso, are looking for **fast and dynamic play** and are ready to dominate the court at all times.

EA10 VENTUS ATTACK 12K XTREM BY EDU ALONSO

LUXURY SERIES

LAUNCH IN
OCTOBER 2025

DESCRIPTION

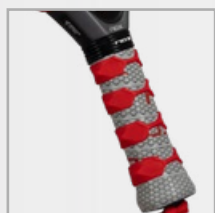

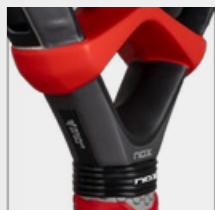

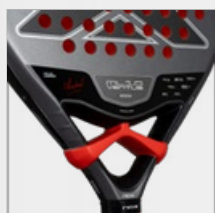

The EA10 Ventus Attack 12K XTREM, designed in collaboration with Edu Alonso, is designed for players looking to dominate the attacking game and make every shot count. It features the **new mould from the 2026 Luxury** racket collection, which improves aerodynamics and overall performance. Its diamond shape, longer grip and high attacking balance allow for powerful shots while maintaining the precision needed to control the decisive moments of the match. The combination of **12K Xtrem carbon** on the faces and the **MLD Black Eva** core guarantees a firm feel, excellent ball rebound and stability even during the most demanding rallies.

ML10 VENTUS CONTROL 3K BY MIGUEL LAMPERTI

DESCRIPTION

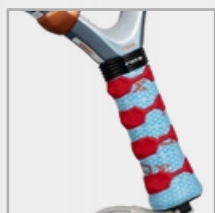

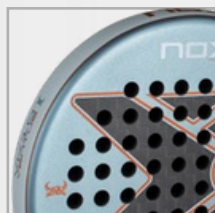

The ML10VentusControl 3K, Miguel Lamperti's new ally, arrives with a new mould to take one of padel's most iconic models to the next level. Recognised for two consecutive years by Testea as the best control racket, this version marks a true revolution of a classic. Its round shape and balanced weight distribution provide a wide sweet spot for absolute control on every shot ideal for dictating the pace of play and building points in your favour. With **3K carbon fibre** on the faces and an **HR3 Colour EVA** core, the **ML10 Ventus Control** delivers exceptional feel, stability and excellent ball rebound, even during the most demanding rallies.

VK10 VENTUS CONTROL 12K

BY ARANZAZU OSORO

DESCRIPTION

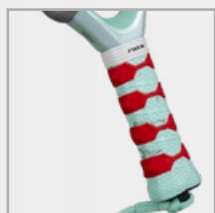

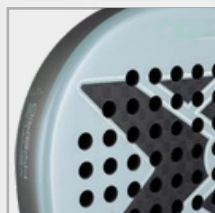

The VK10 Ventus 12K Control, designed in collaboration with Aranzazu Osoro, is designed for players who fight every point with intensity and seek to dominate the court with intelligence and precision. It features the new mould from the 2026 Luxury racket collection, which improves aerodynamics and overall performance. The new racket from "La Vikinga" offers absolute control and a wide sweet spot, ideal for managing the pace of the match and responding with confidence on every shot. It has 12K carbon on the faces and an MLD Black Eva core, providing firmness, stability and great ball output.

VENTUS HYBRID 12K LITE

DESCRIPTION

The Ventus Hybrid 12K Lite is designed for players seeking the perfect balance between **control and power**, with greater manoeuvrability thanks to its reduced weight of 355–365g. It features the **new mould from the 2026 Luxury racket collection**, which improves aerodynamics and overall performance. Its teardrop shape and medium balance provide an agile, versatile response, ideal for adapting to any match situation. Built with a carbon frame, MLD Black Eva core, and 12K carbon fibre faces, it delivers a firm feel, excellent ball rebound and outstanding stability even during the most demanding points.

AT10 PRO CUP HARD BY AGUSTIN TAPIA

LAUNCH IN
OCTOBER 2025

DESCRIPTION

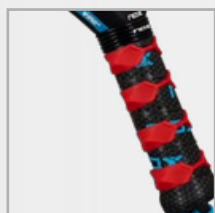

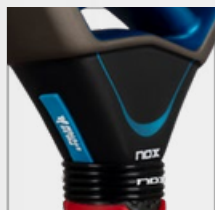

The new AT10 Pro Cup HARD 2026 updates its design while maintaining the essence of an iconic racket, now featuring the mould used by Agustín Tapia in 2025. It incorporates the latest high-performance innovations such as the **EOS Flap**, which enhances aerodynamics and manoeuvrability, and the **Pulse System**, which reduces vibrations for a more comfortable and stable game. Designed for players who prioritise power, this racket combines an aluminised fibreglass structure with a metallic finish for greater reactivity, along with the **HR3 hard EVA** core, delivering a firm feel and powerful ball rebound.

DESCRIPTION

Precision, power, and durability come together in the ML10 Pro Cup Rough, a legendary racket designed for players seeking top performance in every shot. Its round shape and large sweet spot ensure exceptional control, while its HR3 rubber core provides a firm and responsive feel during play. With a carbon structure and Glass Silver faces, this racket offers high durability and excellent ball output. Its rough finish enhances spin, providing greater control on lifted and sliced shots. Weighing 360–375 g with a 38 mm thickness, it delivers versatile balance for any playing style. It also features the innovative Smartstrap® system, which allows the security cord to be replaced for improved hygiene and customization.

The EQUATION Hard maintains its renowned combination of manoeuvrability, control and precision, offering excellent feel and a wide sweet spot thanks to the rubber also used in competition rackets. With medium balance, a carbon frame, and an anti-vibration system, it is designed to protect the player from potential injuries without compromising performance. Its faces feature rough Exclusive Spin, which enhances spin generation on every shot. It also includes the Smartstrap® replaceable safety cord system, making it more hygienic, safer and fully customisable.

ADVANCED SERIES

EQUATION SOFT

LAUNCH IN
OCTOBER 2025

DESCRIPTION

The EQUATION Soft 2026 offers a softer feel thanks to its specialised core, designed for players who prefer greater ball rebound and a more comfortable strike, especially during long or intense sessions. Like its standard version, it maintains a medium balance, carbon frame and anti-vibration system, helping to reduce the risk of injury without compromising performance. The rough Exclusive Spin faces enhance spin generation, while the Smartstrap® system allows the safety cord to be easily replaced, making it more hygienic, secure and customisable.

X-HERO

3 COLORES

LAUNCH IN
OCTOBER 2025

DESCRIPTION

The X-Hero is the ideal racket for beginner and intermediate players looking for a balance between consistency, comfort and manoeuvrability to enjoy every match or training session. Its round shape and state-of-the-art materials guarantee maximum control in every shot, offering a dynamic and fun experience on the court. It incorporates technologies from higher ranges, such as the **HR3 rubber core** for improved power and feel, a **carbon frame** that provides strength and stability and **3K fibreglass faces** that optimise ball rebound. Available in white, red and blue.
